SUMMARY

I am dedicated to empowering individuals through innovative technology so that they can face their challenges with resilience to create a more hopeful world for all.

Hiring Management Team

To whom it may concern:

My work has always centered on using technology to make learning smoother and more accessible. With years of experience in technology support and development and a degree in progress in Technological Entrepreneurship and Management, I bring a practical mix of skills that fit well in a school setting.

In my recent role as a Technology Support Specialist for a large high school district, I was responsible for supporting staff and students across campus every day. This included managing the deployment and upkeep of thousands of devices, troubleshooting network and software issues, and training staff on new systems. Along the way, I built tools to make everyone’s lives easier, including a data app that connected SharePoint and Office 365 so teachers could quickly find the information they needed without waiting on IT.

That work sharpened the skills schools count on in their IT staff: patience, problem-solving, and the ability to keep a busy environment running without slowing learning. I am also expanding my knowledge through my studies, which focus on how to design systems that serve people well, and I enjoy bringing that approach to everyday work.

I am drawn to working in education because technology support in schools has an immediate impact: teachers teach more easily, and students have one fewer barrier to learning. I would welcome the chance to bring my experience and adaptability to your district’s IT team.

Thank you for your time and consideration. I look forward to the chance to support your organization.

Respectfully,

E Lindeman
