PURPOSE

Empowering individuals through innovative technology so that they can face their challenges with resilience to create a more hopeful world for all.

SUMMARY

A technology and operations background connects studies in technology management, computer science, and information systems with practical support and systems work. Work has focused on helping people use systems with less confusion by supporting users, documenting processes, automating repetitive work, and translating needs into practical tools. K-12 IT support experience kept thousands of devices working, produced Power Apps workflows, and created guidance that helped staff solve problems faster. Client service and fulfillment roles have required the same patience, accuracy, and follow-through across client questions, order fulfillment, and regulated support processes. The strongest fit remains work between people, process, and technology, where clear communication and thoughtful systems design can reduce friction. The long-term aim is building reliable tools and workflows that help individuals face challenges with more confidence, resilience, and room to focus on what matters.

EXPERIENCE

Client Services Representative II

📅 Oct 2025 – Present

Bank of America

📍 Utica, NY

- Sustain approximately **100 client calls per day** by applying client service, account servicing, transaction assistance, identity verification, and privacy procedures to keep regulated support requests moving accurately.
- Reduce client confusion by using client communication, policy navigation, and account-servicing knowledge to translate account needs into clear next steps, available options, and follow-up expectations.
- Strengthen downstream servicing continuity by using case documentation and internal servicing systems to record customer interactions, account updates, and follow-up needs.
- Reduce service-request friction by applying escalation management across banking systems, support channels, and downstream servicing teams.
- Improve compliant account servicing by using internal knowledge resources, policy navigation, and procedure interpretation to answer client questions accurately.
- Rank among the **top 5% of performers in the role across all measured performance metrics** by balancing client service, accuracy, compliance, and case quality.

Online Order Fulfillment Associate

📅 Jul 2025 – Oct 2025

Walmart

📍 Utica, NY

- Fulfilled approximately **60 online orders per shift** while using online order fulfillment workflows to pick, stage, and dispense grocery and merchandise orders with maintained order accuracy.
- Sustained approximately **100 items per hour** by using handheld inventory systems, inventory lookup, order-status updates, and substitution validation to reduce fulfillment exceptions.
- Improved customer handoffs by using written and verbal communication to explain substitutions, delays, and pickup readiness during order pickup.
- Protected pickup workflow throughput during peak periods by coordinating stocking, front-end, customer-service, and order fulfillment teams.
- Maintained safe, customer-ready order pickup by applying staging-area organization, safety procedures, and detail-oriented order handling.

Information Technology Support Specialist

📅 Jun 2022 – Jun 2025

Tolleson Union High School District

📍 Avondale, AZ

- Maintained average resolution time under **30 minutes** while sustaining Tier-1 technical support for over 3,000 campus users and one-to-one endpoint devices.
- Cut device setup time in half by using imaging automation and endpoint deployment workflows to **deploy 1,200+ devices per year**.
- Reduced new-staff onboarding time by 25% by developing SOPs, knowledge-base articles, and process documentation for recurring IT support workflows.
- Expanded staff cybersecurity readiness for 120+ staff by delivering formal training, cybersecurity advising, end-user instruction, and help desk support.
- **Reduced recurring information requests by 90%** by designing a Power Apps dashboard with Office 365 Graph API and Microsoft 365/SharePoint data integrations.
- Saved \$70K annually on directly accountable campus hardware support by applying hardware repair, troubleshooting, and endpoint support to out-of-warranty devices.
- Reduced avoidable support requests by using process documentation, user-focused guides, and end-user instruction to enable staff self-service.
- Improved academic-team support by using requirements translation, IT liaison work, and user-centric systems thinking to convert instructional needs into technical solutions.

Mission Technology Specialist

📅 May 2020 – May 2022

The Church of Jesus Christ of Latter-Day Saints

📍 Syracuse, NY

- Maintained continuity for 3,000+ missionaries by leading a **two-week remote-work rollout** with Teams/Zoom policies, VPN, MDM profiles, and remote-support workflows.
- Boosted volunteer engagement by 40% by using Excel automation, workflow systemization, and opportunity matching to build a service-placement tool.
- Halved training time for new lay-leaders by using SOPs, process documentation, and remote-work guidance to standardize onboarding.
- Enabled a seamless online transition across nearly all of upstate New York by using cross-functional coordination and digital content delivery workflows to move services online.
- **Cut weekly service-program prep from 4 hours to 15 minutes** by automating generation and distribution workflows.
- Maintained a sub-3-minute average resolution time for weekly events by using AV support, conferencing support, and live-service troubleshooting.
- Improved weekly inter-congregational event reliability by using technical liaison work, configuration standardization, and collaboration workflows.
- Turned survey and interview feedback into platform improvements by using user research, data analysis, and iterative support workflows.

EDUCATION

Bachelor of Science in Technological Entrepreneurship and Management

📅 August 2026

3.8 GPA; pursuing M.S. in Information Technology starting Spring 2027.

Arizona State University

📍 Online

Associate of Science in Computer Science

📅 August 2024

Graduated Summa Cum Laude, 3.9 GPA

Rio Salado College

📍 Tempe, AZ
