

ENOCH LINDEMAN

Entry-Level Software Engineer / AI Automation Developer

✉ er@lndmn.com
☎ (619) 333-8221
🌐 /enoch-lindeman
📍 Utica, NY

SUMMARY

Technical professional connecting hands-on IT operations with software, automation, data analysis, and AI-enabled tools that improve reliability and usability.

EXPERIENCE

Information Technology Support Specialist

Tolleson Union High School District

📅 Jun 2022 – Jun 2025

📍 Avondale, AZ

- Supported 3,000+ campus devices while translating user problems into reliable technical fixes, documentation, and workflow improvements.
- Automated imaging and deployment workflows for 1,200+ devices per year, cutting setup time in half and improving rollout consistency.
- Helped coordinate laptop distribution for 800+ incoming freshmen by preparing devices, validating inventory, and standardizing exception handling.
- Developed SOPs and knowledge-base articles that reduced new-staff onboarding time by 30% and made repeat issues easier to resolve.

- Designed and deployed a Power Apps dashboard connected to Microsoft 365 data, reducing help desk tickets by 90% and response time by 75%.
- Conducted out-of-warranty hardware repair and lifecycle support, saving approximately \$70K annually on hardware support costs.
- Created user-focused guides and troubleshooting resources that empowered staff to resolve common technical issues independently.
- Served as IT liaison to academic teams, converting operational needs into clear technical requirements and practical user-centered solutions.

Mission Technology Specialist

The Church of Jesus Christ of Latter-Day Saints

📅 May 2020 – May 2022

📍 Syracuse, NY

- Led a two-week remote-work technology rollout for 3,000+ users by configuring Teams/Zoom policies, VPN access, and MDM profiles.
- Built an automated Excel-based volunteer opportunities tool that improved engagement by approximately 40% through clearer matching and access.
- Authored SOPs for remote-work tools, reducing training time by half and improving consistency for distributed nontechnical users.
- Coordinated cross-functional teams to migrate digital content delivery online while maintaining continuity of critical services.

- Automated weekly program generation and distribution, reducing manual preparation from 4 hours to 15 minutes.
- Provided live AV, conferencing, and endpoint support with a sub-5-minute average issue-resolution time during active services.
- Standardized event technology configurations across multiple groups, improving collaboration and reducing repeated setup errors.
- Gathered user feedback through surveys and interviews, then translated findings into platform and process improvements.

Co-Founder / Technical Project Lead

By The Lindemans, LLC

📅 2024 – Present

📍 Remote

- Developed early-stage product and technical strategy for privacy-respecting health technology focused on local data control and user trust.
- Built initial Flutter UI components and began integrating Hive for local-first storage in a modular health data platform concept.
- Researched FHIR-aligned data modeling, encrypted local databases, peer-to-peer synchronization, and CRDT-based architecture.

- Used AI-assisted development workflows to prototype, evaluate implementation options, and accelerate technical planning with human review.
- Created technical roadmaps, governance documentation, and project plans for a small early-stage organization.
- Balanced technical ambition with practical constraints around privacy, maintainability, user experience, and long-term scalability.

PROJECTS

Job Work Time Calculator

Python / Operations Analytics

- Built a Python application to calculate normal time, allowance-adjusted standard time, and total work time from structured inputs.
- Added input validation, reusable functions, fraction parsing, and test output to check results against known spreadsheet models.

Data and Decision Models

Python / Excel / SQL

- Completed analysis projects using regression, outlier detection, forecasting, center-of-gravity, load-distance, and breakeven methods.
- Connected technical outputs to business constraints such as cost, throughput, workflow bottlenecks, and implementation risk.

EDUCATION

Bachelor of Science in Technological Entrepreneurship and Management

Arizona State University

📅 Expected May 2026

📍 Online

4.0 GPA; pursuing M.S. in Computer Science (Big Data Systems).

Associate of Science in Computer Science

Rio Salado College

📅 August 2024

📍 Tempe, AZ

Graduated Summa Cum Laude, 3.9 GPA

TECHNICAL SKILLS

Python	Rust	JavaScript	TypeScript	Dart	Flutter
SQL	Bash	Linux	GitHub	HTML5	CSS3
REST API	Microsoft Power Apps			Microsoft 365 Graph API	
Google Workspace Admin		Microsoft Entra ID		YAML	LaTeX
Google Colab		Pandas	Matplotlib	Machine Learning	
Large Language Models		Prompt Engineering		Data Structures	
Progressive Web App (PWA)		Continuous Integration (CI/CD)			

CORE STRENGTHS

Software Troubleshooting		Automation	Technical Documentation
Systems Thinking		Data Analysis	Workflow Systemization
User-Centered Design			Requirements Translation
Cross-Functional Communication			Process Improvement
Operational Analysis		End-User Instruction	Research-Oriented
Detail-Oriented	Collaborative Problem Solving		Independent Learning
Critical Thinking		Adaptability	Privacy by Design
AI-Assisted Development
